Where Our Apple Scions Come From

## DOMESTIC POSTAGE

First Class Matter (Letters, etc.) .....2 cents an ounce  
 Postal Cards and Private Mailing Cards .....1 cent each  
 Double Postal Cards .....2 cents each  
 Second Class (Newspapers, Periodicals) .....1 cent for 4 ounces  
 Third Class (Books, Circulars) .....1 cent for 2 ounces  
 Fourth Class (Merchandise) .....1 cent an ounce  
 Registration Fee (in addition to postage) .....10 cents  
 Special Delivery Stamp (addition to postage) .....10 cents

First Class Matter—Letters and all other written matter (whether sealed or not), excepting manuscript copy accompanying proof-sheets, also all matter sealed (see below), two cents an ounce, excepting drop letters at non-carrier offices, the patrons of which cannot be served by rural carrier, one cent an ounce. Postal cards, one cent each. Post cards (private mailing cards), one cent each.

Second Class—Newspapers and periodicals, published quarterly and oftener, bearing notice of entry as second-class matter, the general public pay by affixing stamps at the rate of one cent for each four ounces or part thereof when not sealed.

Third Class—Books (printed, not blank), circulars, other printed matter, proof sheets and manuscript copy accompanying the same, valentines, sheet music, photographs, heliotypes, chromos, posters, lithographs and printed advertising matter on paper only—all, when not sealed, one cent for two ounces or fraction. Limit of weight, four pounds.

Fourth Class—See new parcels post law below.

Sealing—Any matter is regarded as sealed when it is not so wrapped as to allow of a thorough examination without in any way injuring the wrapping.

Registration—Any class of mailable matter may be registered at any post-office or station thereof, and by any rural carrier. In residential districts of cities, letters and packages of first-class matter that are not cumbersome on account of size, shape, or weight can be registered by city carriers at the house door. The registration fee is 10 cents for each piece in addition to postage. Indemnity for value up to \$50 is paid for the loss of sealed domestic matter prepaid at the letter rate of postage; and for value up to 50 francs (or its equivalent in United States money) for loss of registered articles addressed to foreign countries embraced in the Universal Postal Union.

Postage to Porto Rico, Philippines, Guam, Hawaii, Canal Zone—Same as given above.

## Parcels Post (Domestic) Rates of Postage

In Effect January 1, 1913

Sec. 8. That hereafter fourth class mail matter shall embrace all other matter, including farm and factory products not now embraced by law in either the first, second or third class, not exceeding eleven pounds in weight, nor greater in size than seventy-two inches in length and girth combined, nor in form or kind likely to injure the person of any postal employee or damage the mail equipment or other mail matter and not of a character perishable within a period reasonably required for transportation and delivery.

	First Pound	Each Additional Pound	for 11 Pounds Charge
Rural Route and City Delivery.....	\$0.05	\$0.01	\$0.15
50 Mile Zone .....	.05	.03	.35
150 Mile Zone .....	.06	.04	.46
300 Mile Zone .....	.07	.05	.57
600 Mile Zone .....	.08	.06	.68
1,000 Mile Zone .....	.09	.07	.79
1,400 Mile Zone .....	.10	.09	1.00
1,800 Mile Zone .....	.11	.10	1.11
Over 1,800 Miles .....	.12	.12	1.32

## FOREIGN POSTAGE

The rates in the case of all foreign countries (except Canada, Cuba, Panama, and Mexico) are as follows: Letters, first ounce or less, 5 cents; each additional ounce or fraction, 3 cents; postal cards, 2 cents; newspapers and printed matter, per 2 ounces, 1 cent; samples of merchandise, first 4 ounces or less, 2 cents; each additional ounce or fraction, 1 cent (limit of weight, 12 ounces). Registration fee, 10 cents.

Letters for England, Ireland, Scotland, Wales, and Newfoundland, per ounce, 2 cents, and letters for Germany by steamers sailing for Germany direct, per ounce, 2 cents.

Mail matter of all kinds addressed for delivery in Canada, Cuba, Panama, and Mexico is admitted to the mails at domestic postage rates and conditions, except commercial papers and bona fide trade samples, which are admitted at a rate of two ounces for one cent, if not weighing over twelve ounces. Seeds, bulbs, scions, and plants for Canada must be prepaid at the rate of one cent per ounce or fraction of an ounce; and packages of salable merchandise for Mexico must be sent by parcels post.

## OUR CERTIFICATE

STATE OF NEW YORK  
Department of Agriculture

This is to Certify, that the stock in the Nursery of the J. B. Morey Nurseries of Dansville, County of Livingston, State of New York, was duly examined in compliance with the Provisions of Section 305 of the Agricultural Law, and was found to be apparently free from any contagious or infectious disease or diseases, or the San Jose scale or other dangerously injurious insect pest or pests.

This certificate expires September 1, 1913.

Dated at Albany, N. Y., Sept. 3, 1912.

CALVIN J. HUSON, Commissioner of Agriculture.

# SPRING CATALOGUE 1913

In 1866 Jonathan B. Morey, the founder of the present J. B. Morey Nurseries, made his first planting of nursery trees.

During his lifetime and up to the present there have been planted in the Morey Nurseries at least 47,000,000 young trees. Stop and think of these figures. Think of the vast amount of labor it required to prepare the ground, to prune, plant, bud, cultivate, and market the product of these enormous plantings. Furthermore we present a clean record, never having had anyone claim that trees received from us have been other than as represented.

For forty-six years we sold our product to other nurserymen and they in turn sold to the planters. Last spring, after years of thought, we came to the conclusion that we would issue a catalogue and sell our stock direct to the planter.

We believe there is a place in the nursery business for a man or firm, that wishes to do as he agrees and advertises. We have determined to carry on our new line of business as we did the old, hoping that each year may see an increase and a larger list of customers.

Last spring we booked and shipped over 600 orders. Each represents a satisfied customer. We hope this year to increase our list of patrons to at least 1200 which will double our output direct to the planter.

Heretofore we have graded our trees according to caliper and to height. This was very confusing to many of our customers, so we have eliminated the caliper of the tree and only offer trees by height; as trees that have made the desired height will caliper in proportion to the height.

In our catalogue of last season we did not offer small fruits or ornamentals. We find that many of our customers prefer to purchase their fruit trees, small fruits, vines and ornamental trees at the same time and place, so we have added this department to our business and can now supply a full line of whatever the planter may want.

You will note on the cover of this catalog an illustration of bearing apple trees. This photograph was taken in Delta County, Colorado. We present it on our catalogue cover to show you the trees from which we procure our scions for the propagation of our apple stock.

For several years past there has been a great deal said and written about "Pedigreed Stock." In order that our customers may have the very best strains of apple we have gone to great expense to have our scions cut from the best producing trees in Colorado.

Dansville has been the leading nursery center for more than sixty years. We are located at the head of the famous Genesee Valley, fifty

miles south of Rochester. Hills to the height of 800 feet surround us on three sides which afford us a natural protection from the severe cold of winter that does so much harm to young trees. The ground in the valley is a dark, black soil for about eight inches in depth, then clay soil, and under the clay a gravel which gives a natural drainage far better than could be secured by the use of tile, thus insuring a healthy root system. A strong and healthy root system lays the foundation for a strong, vigorous and healthy tree.

You will find by writing to the Agricultural Department at Albany, N. Y., that there are more young trees planted in the nurseries of Dansville than in any other nursery section of the United States. There must be some reasons why this is so. We have stated three reasons: The natural location, the soil and drainage. In addition we can truthfully say we are free from San Jose scale and other diseases. It is an admitted fact that in all nursery sections it is impossible to grow trees without constantly spraying so the trees will retain their foliage. A spray pump is an unknown machine in our nursery, and the leaves cling to the trees until they are killed by the frost.

We have a large, frost proof storage house, in which we store our trees for the winter. The trees are taken up late in the fall after the leaves have dropped and the sap has gone to the roots. They are then placed in the storage and the roots covered with damp shingle shavings or excelsior. In the spring they come out of the storage fresh and full of life, ready to push out the new growth as soon as they are planted. Thousands and thousands of trees are hurt by the winter when left in the ground, and when transplanted in their feeble condition a very large percentage of them die. By storing the trees we are enabled to ship the stock so it will reach the planter soon after the frost is out of the ground. In years past, when we had no storage, if the spring was late many trees would be budded before we could dig and ship them.

We have tried, in a concise way, to prove to those interested in the planting of trees that we know our business. To sum up, we would ask you to remember that we use the best buds and scions that can be procured; that we grow quality trees in the right way, on the proper soil, under climatic conditions that are unsurpassed. Also remember that we have the best of storage facilities, and that our work is done by men who have been with us for years. With this statement of facts before you read this catalog from cover to cover. Compare our prices with others. You may not find them as low as some, but they are as low as we can make them consistent with the grade of stock we sell. Let us add your name to our list of patrons.

## HOW TO ORDER

Always give size and age of trees desired, and if no other size than the one ordered will be satisfactory, if we are unable to supply accordingly, money will be refunded.

Planters, in many instances, would be better satisfied to receive trees of the variety ordered, even though of a different grade (adding extra trees or refunding difference if smaller), than to miss getting the trees. Our trees are all young and thrifty, nothing over two years old. If no change in size or age is allowed, so mark order plainly.

It is always best to have these matters understood in ordering, as all stock offered by the J. B. Morey Nurseries will be sold under these terms, and the placing of an order is their acceptance by the purchaser.

All orders are accepted subject to our being able to fill them. Careful record of sales will be kept, but we cannot be held responsible for losses which may cause shortage, such as fire, flood, winter injuries or other causes beyond our control.

Address all orders to

**The J. B. Morey Nurseries**  
**DANSVILLE, N. Y.**

## QUANTITIES ORDERED

We furnish five trees in two varieties or ten trees in four varieties at ten rates; or fifty trees in five varieties, 100 trees in ten varieties at 100 rates; long lists of one or two of a kind always at single rates.

On orders amounting to \$10.00, purchasers may select all stock at 100 rates, provided not less than five of a kind are ordered.

On orders amounting to \$25.00, purchasers may select all stock at 100 rates even though one or two trees of a kind are called for in a few instances.

## CASH DISCOUNTS

We allow a cash discount of 10% on all orders that reach us before March 15th, when cash is received with order.

## TERMS OF SALE

Prices are made for cash with order, but we will book and hold orders amounting to \$4.00 or more for later shipment, when small payment is made on account, at least one-fourth the amount of the order. Balance should reach us not later than April 1st, 1913, as by that time orders should be moving freely.

WE PAPER LINE ALL BOXES, using damp shingle shavings or excelsior, which cannot heat and cannot dry out easily. We guarantee safe arrival anywhere on early orders. No charge for boxing on orders amounting to \$2.50, 25c extra for packing smaller orders. Orders for less than \$3.00 by freight add 35c extra.

## HOW TO SEND MONEY

Cash should never be sent in letters unless registered. Post Office or Express Money Orders, Bank Drafts or Registered Letters will reach us safely, and we cannot be responsible for money sent in any other way.

## NO SUBSTITUTION

We do not reserve the right to substitute. On late orders it is always best to name second choice, or allow us to choose, but if not so desired, say "No Sub."

Trees should be unpacked as soon as they arrive, excepting in cold weather, and report must be made within three days of arrival, of any shortage, or of any trees found not as represented by us.

Any trees not satisfactory to purchaser are to be reported to us at once, carefully protected, and held subject to our orders. When no report is made within the time specified it is understood that the trees or plants are satisfactory and accepted. Club orders or individual orders amounting to \$25.00 or more may select all stock at 100 rates or lowest prices quoted, even though but one or two trees of a kind are wanted in some instances. Early orders only can depend on securing a full assortment of the varieties offered in some lines. Purchasers should not fail to secure the advantages of early ordering. We can hold orders for later shipment when desired.

## MOREY'S GUARANTEE IS 3 to 1

The purity of our trees has already become well established. Every tree sent out is correctly labeled, and great care used to keep the variety pure, but should a mistake creep in we will be responsible for and cheerfully pay in cash all damages that may arise from such mixture up to three times the price paid us for such trees as prove untrue, and it is mutually agreed between the purchaser and ourselves that no more than this shall be asked in any event.

And the purchaser further agrees to keep a careful record by diagram, or record of location in rows, of all trees or plants bought of the J. B. Morey Nurseries, or of trees from any other nurseries, if any such are planted among them or nearby, and to furnish us with a copy of same for verification if we so desire.

## THE APPLE

The original home of the apple is not definitely known. From the best authorities we find that in the early ages it was found growing in most of the countries of the old world, except in the extreme North. When the United States were first settled many of the varieties were brought from the Motherlands and many varieties have been originated in this country.

There are 1856 named varieties of apple, a large proportion of which are only worth fruiting in certain and small localities. We have undertaken in our selection of varieties to confine ourselves to the varieties that do well over a large territory. By confining ourselves to the list which we present to you, we have been able in most instances to secure our buds and grafting scions from bearing trees that are known for their productiveness and quality. We have gone to great expense in securing our buds and scions, having had hundreds of thousands shipped to us from the great orchard centers of Colorado, and if there is any value in pedigreed stock we believe we have it to offer.

A son of the founder of the Morey Nurseries is now located in Colorado. He has been in the nursery business all his life and he is the one who selects the scions for our grafts.

Our description of varieties is as complete as we can give with the limited space in our catalogue. We will be pleased, however, to give a more thorough description of any variety we list upon request.

Prices on apples—two years old		Each	Ten	Hundred
Large	Size, 6 to 7 ft.....	\$0.25	\$2.40	\$22.00

Special	" 2 to 3 ft.....	.07	.70	5.00
Prices on apples—one year old		Each	Ten	Hundred
Large	Size, 4 to 5 ft.....	\$0.20	\$1.75	\$15.00
Medium	" 3 to 4 ft.....	.15	1.50	12.00
Small	" 2 to 3 ft.....	.12	1.00	8.00

We offer 1000 Baldwin Apple buds, one year, 5 to 6 ft., the finest trees we have ever grown, at a special price of \$175.00 or 500 of the same lot at the same price. We consider this one of the best offers of the season.

Baldwin

# J.B. MOREY NURSERIES

DANVILLE, NEW YORK

## Arkansas Black

The Arkansas Black is one of the most beautiful of apples. A good keeper, commands good price. Color lively red on exposed side to purplish red or nearly black.

## Ben Davis

It is unquestionably the leading seller and the most popular apple grown south of the Baldwin region. It ripens later and keeps later than any other apple. It often keeps in ordinary storage till May and in cold storage till June or July. The fruit is thick skinned. It does not show bruises easily and presents a good appearance in the package after being handled and shipped in the ordinary way. It comes into bearing at an early age, usually bears annually and abundantly. Quality of fruit not the best, but usually brings large prices. It is a good commercial seller.

## Black Ben Davis

This is a variety of the Ben Davis type. Very brilliant in color and distinctly attractive in appearance. A good commercial variety.

## Baldwin

Is pre-eminently the leading variety in the commercial orchards in New York, New England, Southern Peninsula of Michigan, and Northern Ohio. It is the standard fruit in American markets and also the leading apple used for export trade. More apples of this variety are put upon the market in New York State than all other varieties put together. It is somewhat slow in reaching bearing age but when mature it bears very abundantly. It is the best of all for commercial purposes.

## Bailey Sweet

A beautiful red apple. Distinctly sweet and of very good quality. Season October to January.

## Boiken

A light yellow apple with beautiful blush; hardy, good quality, brisk sub-acid. Desirable for culinary use. Season February to March.

## Bismarck

Fruit very large with rather thick skin, attractively red in color. Season October to early winter.

## Duchess of Oldenburg

One of the most valuable of the Russian apples. Tree medium in size, fruit medium to large. Skin moderately thick, with irregular splashes and stripes of bright red, mottled and shaded with crimson. Very attractive. Season late August and September.

## Early Harvest

Medium to small, pale waxy yellow; flesh white, crisp, tender, juicy. Good to very good. Season July and August.

## Fameuse

One of the most desirable dessert apples of its season. Keeps well in cold storage. Fruit medium, light bright red; flesh white; very tender and juicy. Season October to mid-winter.

## Fall Pippin

Fruit large, attractive, yellow in color. Flesh tender, rich, good quality. Season September to December.

## Fallawater

Fruit very large, attractive in size and form. Color distinctly yellow and largely blushed with bright, deep pinkish red. Season November to March.

## Gano

This is a variety of the Ben Davis type. Fruit medium to sometimes large; flesh firm, moderately tender, rather coarse; good or nearly good in quality. Season December to May.

## Grimes' Golden

Fruit medium to large. Attractive in form; beautiful rich golden yellow; flesh very firm. Excellent either for dessert or culinary use. Season November to February.

## Golden Russet

Fruit below medium; flesh yellowish, rather fine grained, crisp, tender, juicy, rich. Season December to April, not later.

## Golden Sweet

Fruit of good medium size; attractive clear yellow when fully mature; rich, sweet, very good in flavor and quality. Season mid-August to late September.

## Golden Pippin

Fruit very large; skin tender; attractive yellow when matured; flesh tender, juicy. Season September to January.

## Hubbardston Nonsuch

It is an excellent variety for commercial planting, and deserves to be better known among fruit growers. In many orchards the Hub. is one of the most profitable varieties, as it ripens between the perishable early autumn varieties and the late ripening winter apples. It comes into bearing at an early age; yields heavy crops; almost an annual bearer. Under favorable conditions the tree is a vigorous grower; fruit smooth, uniformly good size and good color. Color yellow or greenish, blushed and mottled with red which varies from dull brown to clear bright red. Flesh moderately firm, fine grained, tender, juicy, rich. Season October to January.

## Jonathan

This is a fruit of the Esopus Spitzenburg class. It is very beautiful, of a bright red color, highly flavored and of excellent quality for either dessert or culinary use. It excels its appearance in hardiness, productiveness, health and vigor, and is adapted to a wide range of territory. At its best it is one of the most desirable varieties for the fancy trade at the holiday season. Flesh whitish, sometimes tinged with red; crisp, tender, juicy; one of the very best varieties. Season November to January, not later. We cannot recommend it too highly for commercial planting.

## King

The fruit is a beautiful red color. It is uniformly large, excellent in quality; it is well adapted for marketing and for packages, and is in good demand for both special and general trade; often sells at an advance over standard varieties in both domestic and foreign markets. Season October to January, not later. Commercial orchards or home orchards should not be without the King.

## Maiden Blush

This is a bright apple of pale lemon yellow color with crimson cheek; fruit medium or above; uniform in size and shape. Flesh white, moderately crisp, tender, very juicy. Season September to December.

## McIntosh Red

Fruit very attractive in appearance, bright red color and good size; flesh firm, fine, crisp, very tender, juicy, perfumed and delicious. It is adapted to a wide range of localities for planting. Season October to December or later. This variety is being planted in large quantities for commercial purposes.

## Mammoth Black Twig

This is a late keeping winter apple; rather large; of good red color and good quality. It is not a desirable variety for growing in New York State because in the northern latitude the seasons are not always favorable to the proper development of its fruit. It keeps later than the Baldwin, but is inferior to that variety.

## Newtown Pippin

Comes into bearing young; reliable cropper; fruit hangs well to the tree; color beautiful yellow. It is greatly sought after in the European markets and brings the highest prices of any apple exported from this country. Season February to May. We recommend this variety for home and commercial orchard planting.

## North West Greening

Attractive in color for a green and yellowish apple. It is harder than R. I. Greening. It cooks evenly and quickly, and as a dessert apple ranks fair to good in quality. Fruit does not reach prime condition before January and remains sound to the close of winter and may be kept till June.

## Northern Spy

The fruit is large and attractive, being of a bright red color over-spread with a delicate bloom. The flesh is very juicy, crisp, tender and most excellent. It is well adapted for either local, general or fancy trade. It has a well established reputation in market and often sells at more than average prices. It is ready for use in November and December and retains its crispness and high flavor well until the close of the season. We cannot recommend this variety too highly.

## Pewaukee

Fruit above medium to large. Often it is poorly colored, being greenish, striped with dull red. When well colored it is a fairly good

## J.B.MOREY NURSERIES

## DANVILLE, NEW YORK

yellow largely washed and mottled with red and splashed with dark carmine. Its season in cold storage is from November to March, sometimes to May.

### Red Astrachan

This is a very beautiful early summer apple of good medium size; yellow largely colored with light and dark red, presenting a striped appearance. For home use it is in season from late July to September. It is very perishable and on this account not well adapted for shipping to distant markets. We only recommend this variety for home planting.

### Red June

An attractive little apple; deep red over yellow; tender, brisk, sub-acid; very good. Season late July to early winter.

### R. I. Greening

R. I. Greening is grown very extensively. The apple, as the name indicates, is green in color. It is commonly deep grass green in autumn and later as it ripens develops more or less of a yellow color. It is regarded as one of the best cooking apples and is one of the best for home and commercial orchards. It is in season from October to April.

### Rome Beauty

When well grown this fruit is of good size, uniform, fair, smooth and handsomely colored. On well drained soils it attains good size and good color and is very satisfactory in commercial orchards. Season November to April or May. We recommend the planting of this variety.

### Stark

Stark is regarded as a good variety for the commercial orchard; tree thrifty, hardy, healthy; reliable cropper; very productive. Color dull red. Season January to June.

### Stayman's Winesap

Comes into bearing young; reliable annual cropper. Originated from the seed of Winesap. Fruit medium to large, uniform in size and shape. It does well in New York, but is especially well adapted for planting in New Jersey, Pennsylvania, Delaware, Maryland and Virginia. Season December to May.

### Spitzenburg

Tree a medium grower; fruit below medium to large; uniform in size and shape; skin tough, sometimes waxy; slightly covered by russet dots. Color rich yellow, almost completely covered with bright red; inconspicuously striped with dark red; flesh tinged with yellow; firm, crisp, tender, juicy. One of the very best varieties. Season November to February or later; in cold storage it may be held till June.

### Sutton Beauty

Fruit medium or rarely large; uniform in size and shape; color attractive bright red striped with carmine; flesh slightly tinged with yellow; firm, crisp, tender, juicy; very good. Season November to March. We recommend this variety for commercial planting.

### Sweet Bough

This variety is a universal favorite for the home orchard. It is one of the finest summer apples, having all the good qualities which will recommend it for general cultivating. Fruit above medium; skin rather thick; greenish yellow; flesh white, firm, fine, crisp, very tender, juicy. Season August and early September.

### Seek-No-Further

Is an old favorite dessert apple. It stands handling and shipping well; not particularly attractive in color; fruit usually about medium size. Skin smooth, rather deep yellow or greenish shaded and splashed with dull red; flesh slightly tinged with pale yellow; firm, medium in grain, crisp, tender, juicy. Season late fall and early winter.

### Tollman Sweet

Fruit medium or below; rather attractive for a yellow apple. Season November to January.

### Twenty Ounce

This is one of the most satisfactory of the fall varieties for commercial planting in New York. It is also highly esteemed for home use. The fruit is large; attractive; green, becoming yellowish, with broad stripes and splashes of red.

### Twenty Ounce Pippin

Attractive in appearance, but second or third rate in quality; not a favorite with fruit growers. In season with King.

## J.B.MOREY NURSERIES

### Wealthy

This variety is particularly valuable for cold climates; the tree is very hardy, and the fruit sells well, being bright red and good in quality for either dessert or culinary uses. It is in season from October to early winter or mid-winter. Crop ripens unevenly, and more than one picking should be made in order to secure the fruit in prime condition. Wealthy is being planted for commercial purposes and we unhesitatingly recommend it.

### Winter Banana

Fruit large; clear pale yellow with beautiful contrasting pinkish red blush; attractive in appearance and good quality. Season November to first of April.

### Wolf River

Fruit large, uniform in size; skin rather thick. Color bright yellow or greenish, mottled and blushed with bright deep red and marked with splashes and broad stripes of bright carmine. Flesh slightly tinged with yellow, firm, tender, juicy. Season September to December.

### Wagener

Is an apple of superior excellence; the color is a beautiful bright red with some contrasting pale yellow. It has fine texture, high flavor and excellent quality. It is very desirable for culinary uses, but is especially esteemed for dessert. It is in season from October to February. It comes into bearing at an early age and is a reliable cropper. In many cases it over bears, so that the fruit does not all develop properly in size and color. Under such circumstances it is a great advantage to thin the fruit; to get best results the thinning should be done as early as June. We strongly recommend this variety for commercial plantings.

### Walbridge

Fruit red striped; rather attractive when well colored. Good for culinary purposes, but not equal to standard varieties of its season for dessert use. Season November to March. Fruit hangs well to the tree, so there is little loss from drops.

## DANVILLE, NEW YORK

### Yellow Transparent

This is one of the best of the extra early apples, being excellent for culinary use and acceptable for dessert. It comes into bearing early and begins to ripen in July and continues in season to September. It is one of the best home apples, and in many instances it pays well as a commercial fruit. It takes on a good clear yellow color before becoming over ripe.

### York Imperial

York Imperial is an important apple which is grown commercially in the middle Atlantic States, extending from these States west into Missouri and Kansas. When properly developed the fruit is large, finely colored, and of good quality. In season from December to April.

### Yellow Belleflower

Yellow Belleflower grows large or even very large. It is distinctly attractive in color for a yellow apple and the color improves in storage, becoming more clearly yellow as the fruit matures. It is held in high esteem for culinary uses and also for its excellent dessert qualities. It is in season from December to April.

### Hyslop Crab

Fruit large, bright colored, dark red or purplish, overspread with thick bloom. The tree is a reliable cropper; it is desirable for home use and for market.

### Transcendent Crab

This fruit has, for many years, been one of the most popular of the Crab apples cultivated. The tree is a good grower; very productive, yielding good to very heavy crops nearly annually. In season from late August to middle of September.

### Whitney Crab

One of the most popular of the large Crab apples, particularly in the West and North. It is in season in August and early September. Comes into bearing young and is very productive.

## THE PEACH

One of the most enjoyable fruits grown in the United States is the peach. It has taken a prominent place in the list of American fruits many years. For a long time it was thought impossible to grow the fruit to any degree of perfection or certainty of crop, except within certain favored districts. Some of the earlier and older varieties are tender and susceptible to the cold of winter, but within recent years varieties have been found that will stand the cold and bear bountiful crops; consequently the area in which peaches can be produced profitably has largely widened. We offer a list of hardy peaches that we know will stand twenty degrees below zero and bear a crop, the quality of which is unsurpassed by any of the older varieties.

Peach culture is like any other business. There is a right way and a wrong way to handle the trees after they are planted. The peach trees we offer are budded upon selected peach pits which are gathered in the mountains of North Carolina. The buds which we use have been tested and we know they are true to name. The list of hardy peaches which we recommend and offer are the Greensboro, Carman, Hiley, Belle of Georgia, Crosby and Hill's Chili. A description of each of the varieties follows.

Prices on Peaches, one year old, any variety listed:

		Each	Ten	Hundred
Large	Size, 5 to 7 ft.....	\$0.15	\$1.25	\$11.00
Medium	" 4 to 5 ft.....	.12	1.00	8.00
Smaller	" 3 to 4 ft.....	.10	.75	6.00
Special	" 2 to 3 ft.....	.07	.50	4.50

### Belle of Georgia

Ripens seven days after Hiley is gone and is one of the finest white peaches that grow. Large, creamy white shaded with red in the sun; firm, perfect freestone; good shipper, good cropper; fine quality and surely nothing could be finer for canning. Hardy in tree and bud; productive and bears year after year.

**Elberta**

## J.B. MOREY NURSERIES

### Carman

Ripens seven days after Greensboro is gone. Is white with red cheek, sometimes almost covered with red; comes into bearing early and abundantly; nearly perfect freestone when well ripened. The demand for Carman last year was more than we could supply. Do not fail to plant this variety.

### Crosby

Ripens five to seven days after Belle of Georgia is gone, and occupies an important place in the list of hardy peaches. Quality is good, and coming as it does after the Elberta season is over, its value is increased. For those who live in unfavorable localities and desire peaches Crosby should be included in their list of varieties. Flesh is yellow, firm; fine for table or canning; freestone.

### Greensboro

Ripens in mid-July. Fruit large, sometimes very large; white nearly covered with red in the sun. Almost perfect freestone when fully ripe. The best commercial early peach of its season in existence.

### Hiley

Hiley ripens four or five days after the last of the Carman. This variety is extremely hardy and very productive. Carman, coming earlier, is perhaps more profitable.

### Hill's Chili

Ripens about five days later than Crosby. Medium size, dull yellow and red; excellent for canning. Hardy in tree and bud and bears year after year.

### Beer's Smock

Large, yellow, mottled with red, moderately rich, juicy and good; free.

## DANVILLE, NEW YORK

### Champion

Ripens first of August. Very large, creamy white with red cheek; sweet, juicy, very high quality. Good shipper, hardy and productive; free.

### Crawford's Early

Fruit large, very yellow with bright red cheek; very beautiful; quality standard; free.

### Crawford's Late

Ripens first of September. One of the best later sorts. Superb in size and shape; splendid yellow with dark red cheek; flesh deep yellow; juicy and melting; rich, winy flavor; free.

### Chair's Choice

Large, yellow and red; yellow flesh and freestone; good in quality.

### Elberta

Ripens middle of August. Large to extra large; golden yellow with brilliant shades of red. Firm, juicy, rich, sweet, thinner in widely differing localities; free. This variety has been more widely planted than any other peach and has made more money for the orchardists than any other known fruit.

### Fitzgerald

Large, handsome yellow with red cheek; perfect freestone. Good quality.

### Gold Drop

Heavy bearer; large, yellow; freestone.

### Kalamazoo

Large golden yellow; freestone.

# J.B.MOREY NURSERIES

## Mammoth Cling

Very large, creamy white, blushed; rich, sweet and delicious. Unexcelled for canning and preserving; quality the very best; tree hardy and vigorous.

## Mountain Rose

Ripens early August. Fruit large; white with much red in several shades; flesh white with a red stain at the stone. Juicy, rich, tender, and sweet. For commercial orchards unsurpassed in its class; free.

## Niagara

Season about with Fitzgerald. It is a very large, yellow peach of excellent quality, and should only be planted in favorable localities.

## Salway

Large, yellow, very late, hardy; bears heavy crops; freestone.

## Yellow St. John

A desirable peach for home use and profitable for market. Deep yellow with a dark, rich red on sun exposed side; quality good; tree strong and vigorous; free.

Warwick, N. Y., April 30, 1912.

THE J. B. MOREY NURSERIES, Dansville, N. Y.

Gentlemen: The trees you sent us were certainly fine value; in fact, never saw better, and we have set a good many hundred at odd times.

Yours very truly,

H. T. Demerest.

# DANSVILLE, NEW YORK

Willoughby, Ohio, June 5, 1912.

THE J. B. MOREY NURSERIES, Dansville, N. Y.

Gentlemen: Your letter containing check received, for which accept our thanks. Must say that we admire the way you people do business. Let that Catalogue come along whenever the lists for 1913 are ready, as we are going to set six additional acres of Apples, and that means more Morey Trees.

Very truly yours,

W. P. Sherman.

Lafayette, N. Y., May 4th, 1912.

THE J. B. MOREY NURSERIES, Dansville, N. Y.

Dear Sirs: The box of trees came last week, and although it had been miscarried, I found the trees O. K., as you had packed them to keep.

I thank you very much for sending me such good trees, as I found the trees better than represented in your Catalogue. I assure you I appreciate your honesty and kindness in filling this order of over thirty varieties of different kinds so satisfactorily, and I am thankful that I have found the right parties to buy trees from.

Respectfully yours,

C. F. Parcels.

Arnold Mills, R. I., May 6, 1912.

THE J. B. MOREY NURSERIES, Dansville, N. Y.

Gentlemen: The shipment of trees arrived all right Saturday the 4th. I admire your promptness and thank you for it.

Yours truly,

L. G. N. Clarmer.

## THE CHERRY

We have grown hundreds of thousands of cherry trees and the stock we have produced has found its way into every state and territory in the country. We have shipped carloads of cherry trees into the states of New York, New Jersey, Pennsylvania, Delaware, Massachusetts, Connecticut, Ohio, Michigan, Illinois, Iowa, Colorado and smaller lots into the remaining states and territories. The sour cherry can be fruited in most all localities and on most soils; however, they do better if planted on soil that is well drained. Sweet cherries are not adapted to so wide a planting range. The best fruit is raised in New York, Pennsylvania, Ohio, Michigan, the Virginias, Maryland and west of the Rocky Mountains. It is thought by some planters that the cherry orchard cannot be made to pay a profitable crop. This is a mistake. We believe there is more money in a well cared for commercial cherry orchard than in any other fruit. In fact, fine crops are raised with very little care. We know of an orchard of sour cherry that was planted in 1905—just seven years ago. The trees were all one year old when planted and were set twenty feet apart each way. The varieties planted were Early Richmond, Dyehouse, Large Montmorency and English Morello. The planting totaled 250 trees. In the year 1909 there was harvested a crop of 2,000 quarts which sold at 8c a quart. In 1910 the crop was 3,000 quarts and sold at 8½c a quart. In 1911 there were harvested 5,000 quarts which sold at 8c a quart. In 1912 4,400 quarts were harvested and sold at 10c a quart. This fruit was packed and shipped to nearby markets; making a total harvest of \$1240.00, and the trees have not reached their full growth. These are figures that were given us by Mr. W. H. Hartman, the owner and planter of the orchard, whose address is Dansville, New York. He recommends as the best producers and money makers for this section—first the Large Montmorency; second, Dyehouse; third, Early Richmond; fourth, English Morello.

**Morello**

## J.B.MOREY NURSERIES

The orchardists of Geneva, N. Y., have a local market, selling to the canning factories, and they have received large returns from their cherry orchards. We urge our friends and customers to plant freely of the cherry. In sweet varieties we cannot recommend too strongly the Bing, Royal Ann and Lambert. We give a description of these varieties on the following pages. There is no reason why cherries should be shipped from California and Colorado to be sold in the markets of our Eastern cities if the orchardists will give the same attention to the producing of fine fruit as they do west of the Rocky Mountains. Eastern fruit growers will have no competition.

Prices on Cherries, two years old, any variety listed:

		Each	Ten	Hundred
Large	Size, 5 to 7 ft.....	\$0.17	\$1.50	\$14.00
Medium	" 4½ to 5½ ft.....	.15	1.25	10.00
Smaller	" 4 to 5 ft.....	.10	1.00	8.00
Special	" 3 to 4 ft.....	.08	.75	4.00

Prices on Cherries, one year old, any variety listed:

		Each	Ten	Hundred
First	Size, 3 ft. and up.....	\$0.17	\$1.50	\$12.00
Medium	" 2 to 3 ft.....	.15	1.00	8.00

### Bing

Originated by Seth Lewelling of Oregon. Fruit large; dark brown or black; very fine; a good shipping variety. It is one of the most delicious sweet cherries, and on the Pacific coast is considered one of the most profitable. Tree hardy and vigorous; foliage heavy; seems to succeed East better than most sweets. This magnificent cherry should be followed by Lambert which is a little later in ripening. Both are grand cherries and with Royal Ann deserve to be planted commercially. We have fruited the Bing and find it productive and one of the best of the sweet varieties.

## DANSVILLE. NEW YORK.

### Black Tartarian

Large; juicy; black; heart-shaped; superb quality. An immense bearer.

### Dyehouse

One of the very best of its season for market or home use. Compared with Early Richmond it is larger, finer and better quality, and a full week earlier. Tree hardy and upright grower. Always productive and quality of fruit good.

### Early Richmond

Medium size; clear bright red; good market sort. Tree good grower; fairly productive.

### English Morello

Tree is especially hardy, but more subject to disease under some conditions than Montmorency. Identical with Wragg with us. Fruit very dark red and sour.

### Governor Wood

One of the best early sweet cherries for home use. Medium to large; light red and yellow. Very good quality.

### Lambert

Another fine sweet cherry. We take the following description from the Year Book of the Department of Agriculture: "This variety appears to have originated under a Napoleon tree in the orchard now owned by Mr. J. H. Lambert at Milwaukee, Oregon. It was planted by the late Henderson Lewelling during and shortly after 1848. This seedling tree was first supposed to have been a cross of Blackheart on

## J.B. MOREY NURSERIES

Napoleon, was grafted to May Duke before it reached bearing age and transplanted to a location at one end of the old orchard. About 1880 the May Duke top was broken off or died and a sprout from the seedling stock was permitted to form a new top to the tree. When it came into bearing its fruit attracted Mr. Lambert's attention and shortly after 1890 small shipments of it sent to Boston and other Eastern markets sold at a much higher price than other varieties shipped at the same time." We have tested this variety and recommend it as one of the largest of all cherries. Dark purplish red, turning almost jet black when ripe.

### Large Montmorency

This is the large business, sour cherry. We grow this variety in large quantities—nearly as many as all other varieties combined. Different varieties are grown under the name of Montmorency, but we have the genuine business Montmorency.

### Louis Phillippe

Dark red when fully ripe. It is one of the very best quality sour cherries; valuable for the home orchard.

### May Duke

One of the best of the Dukes. The fruit is of excellent quality and ripens gradually; large, rich dark red; productive.

Lockport, N. Y., April 25, 1912.

THE J. B. MOREY NURSERIES, Dansville, N. Y.

Dear Sirs: I enclose money order for the trees, which I have all set out, and am waiting for the others to come. Hope they will soon get here. Everybody that sees the trees thinks they are fine.

Yours truly,

Frank J. Walker.

## DANSVILLE, NEW YORK

### Napoleon

A beautiful and delicious large yellow sweet cherry with a most attractive bright red blush. An excellent shipper and famous as a variety for canning.

### Olivet

Large, dark red; fine for home orchards.

### Royal Ann

A magnificent large pale yellow sweet cherry with a bright red cheek, and we unhesitatingly recommend it as highly as we do Bing and Lambert, both for home and commercial orchards.

### Windsor

Liver colored; very hardy; sweet.

### Wragg

Is a seedling of English Morello, and with us the fruit is almost identical.

Harlen Springs, Ohio, April 27, 1912.

THE J. B. MOREY NURSERIES, Dansville, N. Y.

Dear Sirs: My trees arrived on the 25th in fine shape, and we are very much pleased with them. Thanks for extras. If I live till next spring will send you a good order.

Very truly yours,

Jas. A. Lawrence.

## THE PEAR

There are only certain localities where pear culture can be made to pay in a commercial way. We have, however, within the state of New York, a certain district or belt in which this fruit is raised to perfection and large returns received. Our advice would be, if you are located in a section of country where fine fruit can be raised, to plant liberally of the pear, otherwise only plant in such quantities as will supply the home table. We grow pears in large quantities, but confine them to a limited number of varieties—such as we can fruit ourselves and can recommend without hesitation or qualification.

Prices on Standard Pear, two years old, any variety listed:

		Each	Ten	Hundred
Large	Size, 5 to 7 ft.....	\$0.25	\$2.25	\$20.00
Medium	" 5 to 6 ft.....	.20	1.75	15.00
Smaller	" 4 to 5 ft.....	.15	1.25	10.00
Special	" 3 to 4 ft.....	.10	1.00	7.00

Prices on Standard Pear, one year old, any variety listed:

		Each	Ten	Hundred
Large	Size, 3 to 4 ft.....	\$0.20	\$1.75	\$15.00
Medium	" 2 to 3 ft.....	.15	1.30	12.00

### Bartlett

One of the oldest and best varieties. Rich, golden yellow when ripe; often with soft blush; large; thin skin; buttery and melting, with a rich musky flavor. Tree a strong grower; bears young and abundantly; should have careful cultivation to bring it up to its highest standard of excellence. It is more highly esteemed for canning and shipping than any other variety. Succeeds best as Standard but does well as Dwarf.

### Beurre d'Anjou

One of the most delicious late fall pears; juicy and of excellent quality. A large, handsome fruit; greenish yellow; blush dull red and clouded with russet. With proper care can be kept until the holidays. Valuable and profitable; should be largely planted, commercially, as it succeeds everywhere. It is popular on all markets, and is one of the very good things that have been overlooked.

Bartlett

## J.B. MOREY NURSERIES

### Clapp's Favorite

Pale yellow with a bright cheek; a large, fine looking pear; juicy, melting and good. It will always be a favorite with many orchardists.

### Duchess

A young bearing tree, often fruiting first season after planting. Fruit is large, frequently weighing one pound; a dull greenish yellow, spotted russet; flesh white, rich and good quality. A most dependable crop and profitable market bearer; valuable both as Standard and Dwarf.

### Flemish Beauty

Pale yellow almost covered with light russet, becoming reddish-brown when ripe; large, beautiful, melting, sweet, rich and fruity. When perfect it is a superb bearer; considered one of the hardiest and best of bearers. Great crops of perfect fruit.

### Howell

Large, pale waxen yellow pear; fine red cheek; value underestimated. Tree a free, upright grower and a young, annual and abundant bearer.

### Kieffer

Has become a most profitable market variety on account of its good shipping and keeping qualities. Its standard size and wonderful beauty make it an ever ready seller on the market. Tree a most vigorous grower and early bearer.

### Koonce

Golden yellow with bright blush; juicy, sweet and of fair quality. A sure cropper, handsome and sells well. One of the largest early pears.

### Lawrence

Greenish yellow, marked with russet; medium size, sweet and good. Tree a moderate grower; abundant bearer; long lived; a most valuable commercial sort.

### Seckel

Most exquisitely flavored pear known. Fruit small, yellow with red cheek; melting, sweet and aromatic. Close of September.

## DANVILLE, NEW YORK

### Sheldon

Fruit medium size; yellow with red cheek; flavor rich. One of the best dessert pears.

### Wilder Early

A pear of excellent quality that is being widely planted commercially. Of medium size; fine grained, tender and juicy; greenish yellow with brownish red cheek. Tree a fine bearer of heavy crops.

### Tyson

One of the very finest small summer pears, both for market and dessert. Yellow with russet shading. Quality standard; melting, juicy and fine. No home garden is complete without at least a few of these trees.

### Dwarf Pears

Dwarf Pears are grown by budding on imported Quince stocks. Pears grown in this way usually come into bearing earlier in life and bear abundantly. We recommend the planting of Dwarf pears for home orchards. The same description of fruit, as given in the preceding pages, will cover the following varieties:

### Bartlett

Fine, either Standard or Dwarf.

### Clapp's Favorite

Good Dwarf, but apt to blight.

### Howell

Especially fine as Dwarf.

### Seckel

Succeeds well either as Standard or Dwarf.

### Duchess

Is the queen of pears and Dwarf is planted largely for commercial and home use. We cannot recommend this variety too highly as a money maker.

## THE QUINCE

The demand for Quinces is rapidly increasing in a commercial way. The tree comes into bearing early in life and yields profitable crops. Like all other fruit trees the better care and attention that is given to them the better they bear and respond to the care and culture. We offer Quince trees 1 year old and 2 years old. We strongly advise the planting of 1 year trees.

Prices on Quince, two years old, any variety listed:

		Each	Ten	Hundred
Large	Size, 4 to 5 ft.....	\$0.20	\$1.75	\$15.00
Medium	" 3 to 4 ft.....	.15	1.25	10.00
Special	" 2 to 3 ft.....	.10	.90	6.00

Prices on Quince, one year old, any variety listed:

		Each	Ten	Hundred
Large	Size, 4 to 5 ft.....	\$0.15	\$1.25	\$11.00
Medium	" 3 to 4 ft.....	.13	1.10	9.00
Special	" 2 to 3 ft.....	.08	.75	5.00

### Angers

A free bearer of good size fruit which keeps well, but is not equal in quality to the following sorts:

### Bourgeat

Tree a strong, distinct grower, surpassing all others; yields immense crops; fruits at three or four years in the nursery row. Fruit round, rich golden color; smooth, very tender when cooked. It has been kept until February in good condition.

### Champion

A prolific and constant bearer; fruit averaging larger than the Orange; more oval in shape. Quality equally fine and a long cropper; bears exceedingly young; ripens late.

### Orange

One of the best for cooking; a valuable golden yellow Quince widely planted. Flesh firm with good flavor.

### Rea's Mammoth

Seedling of the Orange; averaging much larger; of the same form and color; very productive.

**Rea's Mammoth**

## THE PLUM

Ten states produced 82% of the plums of the United States in 1899. The census of 1900 shows that in the preceding year the total crop in the country was 8,764,032 bushels, of which California, Oregon, New York, Washington, Michigan, Iowa, Texas, Arkansas, Ohio and Kansas, named in order of yield, produced 7,429,248 bushels and other states yielded 1,334,784 bushels. Of these ten states three—California, Oregon and Washington holding first, second and fourth places in production—used by far the greater parts of their crops for prunes. Four others—Iowa, Texas, Arkansas and Kansas—grew the native Japan varieties almost exclusively. New York, with a crop of 313,686 bushels in 1899; Michigan, with 213,682 bushels the same year, and Ohio, with 81,435 bushels, grew the main crop of domestic varieties for the states in which plums are not made into prunes.

At the end of the nineteenth century the plum ranked third in commercial value among orchard products, being surpassed only by the apple and peach. The plum is comparatively easy to suit in the matter of location of orchards. Plums are grown with immense success on the elevated and sloping lands adjoining the Great Lakes, the Central Lakes of Western New York, and on both banks of the Hudson. Unquestionably there are many other locations than those named about the waterways and also upon the elevated lands; in fact, on any land suited to general farm crops where the severity of winter is tempered by the lay of the land and where late spring frosts are infrequent, plums may be grown. The chief requisite for the best production seems to be in good drainage.

To make the plum crop pay it should be sent to market in six, eight and ten-pound baskets, with the preference at present for the smaller of these baskets. The fruit should be packed in the most careful manner, and much pains should be taken in the sorting and grading for the fancy market.

Yellow Egg

## J.B. MOREY NURSERIES

There are more young plum trees grown in and about Dansville than any other nursery section in the United States. It is an admitted fact that 75% of the domestic and European varieties of plum are propagated within five miles of our nurseries. This being true why not buy your trees from the nurseries in which they are grown?

Prices on Plum, two years old, any variety listed:

		Each	Ten	Hundred
Large	Size, 6 to 7 ft.....	\$0.25	\$2.25	\$20.00
Medium	" 5 to 6 ft.....	.20	1.75	15.00
Smaller	" 4 to 5 ft.....	.15	1.25	10.00
Special	" 3 to 4 ft.....	.10	.75	5.00

Prices on Plum, one year old, any variety listed:

		Each	Ten	Hundred
Large	Size, 3 to 4 ft.....	\$0.20	\$1.75	\$15.00
Medium	" 2 to 3 ft.....	.15	1.25	10.00

### Abundance

Though this variety has been in market only a quarter of a century it is now about as well known as any other plum, being perhaps the best known of the Japan varieties. The two chief assets which have given the variety its great popularity so quickly are, its adaptability to a wide diversity of soils and climate and, as its name implies—Abundance of fruit—for it bears not only heavily, but yearly. This variety was imported from Japan by Luther Burbank in 1884. It is hardy and very productive; fruit early; season short. Color pinkish red changing to dark red; medium size, very juicy, tender and melting; stone clinging.

### Bradshaw

Bradshaw leads all other plums in number of trees in New York State; the trees grow rather slowly and are rather slow in coming into bearing. Bradshaw does not deserve the high place that it holds with

## DANSVILLE. NEW YORK.

plum growers, and must give way sooner or later to better varieties for commercial orchards. The value of the crop is greatly lessened in New York State because it ripens in the midst of the peach season. Tree large and vigorous; very productive; fruit mid-season. Color light purplish-red changing to dark reddish-purple at maturity.

### Burbank

Tree large, vigorous; fruit early; season long. Color dark red over a yellow ground mottled with thick bloom; freestone; flesh deep yellow. This plum was produced from pit sent to Luther Burbank by a Japanese agent in 1883.

### Coe's Golden

Large, oval, bright yellow; rich, juicy, fine quality and a good grower. Ripens in September.

### German Prune

Tree of medium size, rather vigorous. Color purplish-black overspread with thick bloom. Fruits late in season. We cannot recommend this variety too highly.

### Gueii

The popularity of Gueii is due to its being a money maker. Tree large and vigorous; color dark purplish-black overspread with thick bloom; stone usually clinging; a good shipper. Tree above medium in size; very late; season medium; unusually large when well grown.

### Imperial Gage

On suitable soils this variety possesses all the qualities that constitute a fine plum. Color dull greenish yellow. Tree vigorous and large.

## J.B.MOREY NURSERIES

### Lombard

This plum is known by all, and is probably more widely grown than any other plum if the whole continent be considered. It adapts itself to widely differing soils and climates. Tree of medium size, round top; fruits mid-season; ripening period long. Color light to dark purplish-red overspread with thick bloom; stone semi-free to free.

### Monarch

No plum of recent introduction has so quickly attained popularity as the Monarch. Tree of medium size and vigorous. Fruit late; color dark purplish-red. It is suggested that it be planted in the eastern section of the United States.

### Moore's Arctic

Tree small, of medium vigor. Fruit mid-season; ripening period long. Color dark purple, becoming purplish-black at full maturity.

### October Purple

This is a Japan variety. Tree is strong and vigorous. Fruit mid-season or later; ripening period long;  $1\frac{7}{8}$  inches in diameter. Color dark red over a yellowish-green ground with bloom of medium thickness. Flesh light yellow, frequently tinged with red; very juicy, sweet, mild; stone clinging. On account of its long period of ripening it is a desirable fruit not only for home gardens but for commercial purposes.

### Pond's Seedling

Pond's Seedling is pre-eminent among plums for its large size. It is distinguished also by its form and color, both being pleasing as well as distinctive. Tree of medium size; fruit late; season short; 2 inches by  $1\frac{3}{4}$  inches in size. Color varies from reddish-purple to purplish-red overspread with thick bloom. Flesh attractive golden yellow, of average sweetness; mild, firm; good quality. Stone semi-free to free.

## DANSVILLE, NEW YORK

### Reine Claude

Tree of medium size and vigorous; fruit mid-season; color a yellowish green; stone semi-clinging. For the qualities that gratify, or, assist in gratifying a sense of taste, richness of flavor, consistency and texture of flesh, and abundance of juice, there is no plum that will surpass the Reine Claude.

### Satsuma

This is a Japan variety. Tree medium to large. Fruit mid-season or later; color dark, dull red.

### Shipper's Pride

Tree large, vigorous; fruit late; intermediate in length of ripening season. Color purplish-black overspread with thick bloom.

### Shropshire Damson

It is enormously productive, bearing its load of fruit year after year. It is a standard among fruits for productiveness and reliability in bearing. Fruit of very good size and one of the best for culinary purposes. Fruit late; season long; color purplish-black overspread with thick bloom. Flesh golden yellow, juicy, firm and tender.

### Yellow Egg

It is the largest and handsomest of the yellow plums, and we recommend it for the home garden or commercial orchard. Fruit late; season short.

### German Prune—Dansville

The German Prune, which is in such great demand, made its appearance in Dansville with a few German immigrants many years ago. They brought with them pits and young trees. During all these years the German Prune has been extensively cultivated, and many trees have been raised from the pits. There has been a careful selection made from these various trees until we have a distinct variety of German Prune which is the best prune in the United States, and to-day many of the best prune orchards in the country are from this strain of German Prune.

## HARDY NATIVE GRAPES

Price of all varieties:

	Each	Ten	Hundred	Thousand
2 year vines .....	\$0.10	\$0.90	\$6.00	\$50.00
1 year vines .....	.08	.75	4.00	35.00

### Concord

Black; early; bunch and berries large; ships well; juicy, sweet; pulp tender.

### Delaware

Red; bunch small, berries rather small; flesh juicy, sweet.

### Brighton

Red, large bunch; berries large; one of the earliest in ripening.

### Worden

Black; bunch large, berries very large; skin thin; superior quality.

### Moore's Early

Black; bunch large; hardy.

### Campbell's Early

Bunch very large; glossy black with blue bloom, sweet and juicy.

### Niagara

The best white grape that is grown; splendid quality; productive bearer, and good shipper.

### Catawba

Dark red; bunch large. A late keeper, splendid for both table and wine.

Concord

## RED RASPBERRIES

CUTHBERT—We consider this the best of the red varieties. An abundant bearer and yields heavy crops. Price 35c per 10; \$1.25 per 100; \$9.00 per 1000.

## BLACKBERRIES

We offer Eldorado, Snyder, Erie and Lawton. Price 35c per 10; \$1.75 per 100; \$15.00 per 1000.

## STRAWBERRIES

We offer Brandywine, Crescent, Excelsior, Fairfield, Gandy, Glen Mary, Klondike, New Home, Pineapple, Sharpless and Warfield. Price 60c per 100; \$5.00 per 1000. In order that strawberries may not be hurt in transit they must be shipped either by mail or express and cannot be shipped until May first.

## GOOSEBERRIES

DOWNING—This is the most valuable of all varieties. It is the largest in size and best in quality. Price, 2 year bushes, 15c each; \$1.25 per 10; \$9.00 per 100.

INDUSTRY—Fruit of large size; color dark red. Price, 2 year bushes, 20c each; \$1.75 per 10; \$15.00 per 100.

Mason, Mass., May 10, 1912.

THE J. B. MOREY NURSERIES, Dansville, N. Y.

Dear Sirs: I enclose amount of bill. My trees are all right, and I think the other party will like his.

Very truly yours,

F. D. Rogers.

Erie

**J.B.MOREY NURSERIES**

**DANSVILLE, NEW YORK**

**Perfection**

## **ASPARAGUS**

CONOVER'S COLOSSAL—Planted largely by market gardeners. Superior quality. Price 20c per 10; \$1.00 per 100; \$5.50 per 1000.

PALMETTO—The earliest variety; of excellent quality. Price 20c per 10; \$1.00 per 100; \$5.50 per 1000.

## **CURRENTS**

Currents are easily grown and very successful everywhere, but as they are damaged by the direct rays of the sun they should be planted in moist, shady places. Price of all varieties: 2 year, 10c each; 75c per 10; \$5.00 per 100; \$45.00 per 1000.

WILDER—Large brilliant red; fine quality. One of the strongest and most productive growers.

VICTORIA—Bright red; excellent quality but rather small. A strong grower and one of the best bearers.

FAY'S PROLIFIC—Handsome red; productive when properly grown. Does not succeed so universally as some other sorts.

WHITE GRAPE—Very large; excellent quality, mildly acid. Very productive.

---

Elmhurst, Pa., May 6, 1912.

THE J. B. MOREY NURSERIES, Dansville, N. Y.

Dear Sirs: Trees arrived in good condition. They are very good ones.

Yours truly,

K. G. MacAskie.

## HARDY ORNAMENTAL TREES

EUROPEAN ASH—Large spreading tree of rapid growth; dark foliage. 25c.

PURPLE-LEAVED BEECH—A splendid tree for the lawn. The foliage in the spring is a deep purple. 50c.

CUT-LEAVED WEEPING BIRCH—The best of all weeping trees. Its tall, slender, yet vigorous growth, grand drooping habit, silvery white bark and delicately cut foliage present a combination of attractive characteristics rarely met with in a single tree. 5 to 6 ft. 40c each.

AMERICAN ELM—A noble native tree of large size, wide spreading head and gracefully drooping branches. One of the grandest park and street trees. Price 8 to 10 ft. 50c; 6 to 8 ft. 40c.

NORWAY MAPLE—Large handsome tree of spreading, rounded form, with bright deep green, shiny foliage. Its compact habit and straight vigorous growth render it one of the most desirable species for the street, park, or garden. Price 10 to 12 ft. 60c; 8 to 10 ft. 45c; 6 to 8 ft. 35c. WRITE FOR SPECIAL PRICE ON LARGE QUANTITIES.

SILVER MAPLE—A hardy, rapid-growing native tree of large size. Valuable for producing quick shade and excellent for street planting. Price 8 to 10 ft. 45c; 6 to 8 ft. 35c.

CAROLINA POPLAR—A vigorous, healthy native tree of rapid growth with large glossy leaves, valuable for park or street planting. Makes a fine spreading head if well cut back the first few seasons. Succeeds everywhere. Price 10 to 12 ft. 15c each; \$1.20 for 10; \$10.00 for 100. WRITE FOR PRICES ON LARGE QUANTITIES.

## J.B.MOREY NURSERIES

EUROPEAN LINDEN—A vigorous tree of medium size. Its handsome form, growth and foliage make it one of the finest ornamental trees. Price 6 to 8 ft. 30c.

MOUNTAIN ASH—A fine hardy tree with dense and regular head. Covered from July to winter with great clusters of bright red berries. Price 6 to 8 ft. 25c.

KILMARNOCK WEEPING WILLOW—Price 75c each.

RUSSIAN MULBERRY—Price 6 to 8 ft. 50c each.

DOWNING MULBERRY—Price 4 to 5 ft. 50c each.

### ROSES

Price of all varieties of Rose Bushes: Strong, 2 year, 20c each; \$1.75 per 10; \$15.00 per 100.

GENERAL JACQUEMINOT—Holds first place among the dark red roses. Rich crimson scarlet.

FRAU KARL DRUSCHKI—A pure paper white; large size and free flowering. The flower is perfect in form with fine long stems.

BARONESS ROTHSCHILD—Grand late blooming pale pink variety of full cupped form.

CAPT. HAYWARD—High built, large, full, handsome flowers of carmine crimson.

CLIO—Color delicate satin blush with a light shading of rose pink at the center.

## DANVILLE, NEW YORK

EARL OF DUFFERIN—Rich crimson maroon with dark velvety shades. Flowers large, full, and globe shaped with thick fragrant petals.

JOHN HOPPER—A beautiful dark pink.

MAGNA CHARTA—A general favorite, prized on account of its strong, upright growth and bright, healthy foliage as well as its magnificent bloom.

MARGARET DICKSON—One of the choicest of the June roses with flower nearly as large as Paul Neyron. Pure waxy, unblemished white.

PAUL NEYRON—One of the finest hardy roses ever grown. It blooms unceasingly from June to November.

LA FRANCE—A constant bloomer; deep rose in color. The sweetest of all.

### CLIMBING ROSES

CRIMSON RAMBLER—The famous crimson clustered climber; makes growth of 8 to 10 feet in a season. Flowers are produced from ground to tip.

DOROTHY PERKINS—A bright shell-pink. Foliage finer, smoother and darker than Crimson Rambler.

BALTIMORE BELLE—Pale blush, nearly white; blooms in clusters.

YELLOW RAMBLER—Light canary shade; clusters smaller; individual flowers larger than Crimson Rambler.

## J.B. MOREY NURSERIES

## DANVILLE, NEW YORK

### HARDY FLOWERING SHRUBS

**ALTHEA**—Blooms late in August and September. Strong 2 year plants, 20c each.

**CALYCANTHUS**—A unique shrub of quick growth with flowers of chocolate red; very fragrant. Strong 2 year plants, 25c each.

**DEUTZIA**—Valuable, heavy sustaining shrubs which vary considerably in height and habits, but bloom in dainty bell-shaped flowers. 2 year plants, 25c each.

**FORSYTHIA**—These shrubs grow from 8 to 10 feet tall. They bloom early in spring before the leaves appear. Color rich yellow. Fine 2 year shrubs, 25c each.

**HYDRANGEA**—15c each or \$1.25 for 10.

**HYDRANGEA, TREE SHAPED**—60c each or \$5.00 for 10.

**SPIRAEA**—All the Spiraeas bloom with extravagance which makes them very striking. Their style, color and habits differ, so that a collection of varieties will insure bloom the entire season and still avoid the monotony of repetition. Strong 2 year plants in assorted varieties, 25c each.

**NEW DOUBLE-NAMED LILACS** at 60c each.

**CALIFORNIA PRIVET**—The most popular of all ornamental hedges. Not only is it beautiful for hedges; but for grouping on lawns it is magnificent, as it can be sheared to any desired shape. Price 18 to 24 inches, \$5.00 per 100; \$30.00 per 1000.

### HARDY CLIMBING VINES

**AMPELOPSIS VEITCHII**—25c each.

**CLEMATIS, JACKMANI**, and other flowering sorts, at 50c each.

**DUTCHMAN'S PIPE**—50c each.

**HONEYSUCKLE**—In variety, 25c each.

**MATRIMONY VINE**—25c each.

**SILK VINE**—30c each.

**WISTARIA**—Purple, 2 year, 35c each.

Plants

# Collections for the Home Orchard

At these prices add twenty-five cents for packing on single collections ordered alone.

When a collection is ordered with other trees, or where two or more collections are ordered together, no extra charge is made for packing, excepting on freight orders amounting to less than \$3.00 which have to be boxed. In such cases add 35c to cover the cost of box.

Do not make any change in the varieties offered in these collections, as prices are made low on account of being put up in large quantities. Simply order collections by name; it is not necessary to give list of varieties.

## Collection of Hardy Peaches

(GUARANTEED)

- 1 Greensboro, 2 Carman, 2 Hiley, 2 Belle of Georgia, 1 Crosby, 1 Hill's Chili. 9 trees of the regular 3 to 4 ft. grade for \$1.00, 4 to 5 ft. \$1.35.

# Testimonials

New Lebanon Centre, N. Y., May 21, 1912.

THE J. B. MOREY NURSERIES, Dansville, N. Y.

Dear Sirs: Enclosed herewith is check for \$189.50 as per bill rendered. The trees are very satisfactory and I trust we may do business with you again in the future.

Very truly,

Austin D. Haight.

Adrian, Mich., May 2, 1912.

THE J. B. MOREY NURSERIES, Dansville, N. Y.

Dear Sirs: I received box of trees Thursday, April 25th. The tree roots were a little dry, but I dampened them and had them planted that evening by a man who understands the work. He says he has never yet lost a tree.

I am pleased with the size and looks of the trees, and will want more next spring.

Very truly,

H. B. Gray, 61 Maple Ave., W.

Highland, N. Y., May 23, 1912.

THE J. B. MOREY NURSERIES, Dansville, N. Y.

Gentlemen: The 300 Peach trees arrived in good condition, and I was very much pleased with them. Every one is growing now.

Thanking you, I am,

Sincerely yours,

Harold W. Ford.

Chief, Mich., May 1, 1912.

THE J. B. MOREY NURSERIES, Dansville, N. Y.

Dear Sirs: The trees you shipped me came on the 7th of May and they were on the road almost a month. They were in good condition. All are coming first rate with the exception of about five which are a little slow in leafing out. I am pleased with them and expect to order more in the fall.

Yours truly,

Edwin C. Dickson.

New Castle, Pa., May 13, 1912.

THE J. B. MOREY NURSERIES, Dansville, N. Y.

Dear Sirs: Excuse me for not writing you sooner. I have the trees all out and I think every one will grow. I never saw as nice a bunch of trees; better than I expected.

Thanking you for your kind and fair treatment, I remain,

Yours truly,

J. A. Cover.

Jersey City, N. J., May 7, 1912.

THE J. B. MOREY NURSERIES, Dansville, N. Y.

Gentlemen: A fine looking lot of trees, every one up to standard, stocky and ready for business of living up to reputation.

Thanks for your promptness in forwarding shipment on date promised.

Sincerely,

Frank B. Berry.

West Acton, Mass., May 25, 1912.

THE J. B. MOREY NURSERIES, Dansville, N. Y.

The trees that I ordered in March arrived O. K. the last of April, and I was very well satisfied with them, especially the Baldwins and the Quince trees.

Very truly yours,

H. J. Livermore.

Sunnyslope Farm, May 2, 1912.

THE J. B. MOREY NURSERIES, Dansville, N. Y.

Gentlemen: I enclose check for \$14.10 in payment for the trees received from you. I have bought trees from a good many nurseries but never had as fine and uniform a lot of trees. I plan to plant considerable next fall.

Sincerely,

A. L. Richie, Riverton, N. J.

# Testimonials

Mr. H. M. De Right, of Williamson, N. Y., came to Dansville to purchase trees. After thorough investigation and comparison he placed his order with us for the following trees for spring delivery:

1200 Yellow St. John Peach, 4 feet and up.  
1100 Elberta Peach, 4 feet and up.  
400 Orange Quince, 2 yr. old, 4 feet and up.  
400 Champion Quince, 2 yr. old, 4 feet and up.  
450 Montmorency Cherry, 2 yr old, 5 to 7 feet.

The trees were being packed away in storage for the winter at the time he called upon us, and he was so pleased with the class and character of stock that we handled that he made the purchase from us. We would ask you to write him and let him tell the story.

Rev. W. B. Smiley, of East M'Keesport, Pa., purchased a small order from us last year. He was so well satisfied that on Nov. 1st he placed his order with us for Spring for:

525 1 yr. old Apple trees, 4 feet and up.  
250 Plum trees, 5 to 6 feet.  
100 Standard Pear trees, 5 to 6 feet.  
625 Peach trees, 2 to 3 feet.  
350 Cherry trees, 4 to 5 feet.

Can there be a more satisfactory testimonial than above?

Tife Lake, Mich., May 14, 1912.

THE J. B. MOREY NURSERIES, Dansville, N. Y.

Dear Sirs: Received trees to-day. Am more than satisfied with them. Will give you my future orders.

Ira Giddings.

Kyserike Sta., N. Y., Sept. 24, 1912.

THE J. B. MOREY NURSERIES, Dansville, N. Y.

Gentlemen: Last year I purchased a small bill of 550 trees of you, which have proven more than satisfactory.

Very sincerely,

C. H. Glaize.

Port Huron, Mich., April 30, 1912.

THE J. B. MOREY NURSERIES, Dansville, N. Y.

Gentlemen: The trees arrived April 28th in first-class condition and all O. K.

Yours respectfully,

J. F. Fenner.

Jersey Shore, Pa., May 6, 1912.

THE J. B. MOREY NURSERIES, Dansville, N. Y.

Dear Sirs: I have planted all the trees and they are doing fine. The order is all O. K.

Yours truly,

G. L. Bickel.

Chicago, Ill., April 15, 1912.

THE J. B. MOREY NURSERIES, Dansville, N. Y.

Dear Sirs: I have just returned from New England after setting the fruit trees. I found them O. K.

Yours truly,

W. R. Mersereau.

Milton, Vt., Oct. 26, 1912.

THE J. B. MOREY NURSERIES, Dansville, N. Y.

Dear Sirs: On Sept. 2d you acknowledged order for 402 McIntosh. 1 year, 4 feet and up, to be of the same quality as shipped to me the past spring. I am enclosing check for \$10.00 deposit on above.

Yours truly,

Wm. S. Spencer,

By M. H. Moody.

Brocton, N. Y., May 8, 1912.

THE J. B. MOREY NURSERIES, Dansville, N. Y.

Dear Sirs: The Cherry trees were all satisfactory.

Yours very truly,

H. E. Lilley.

Bardwell's Ferry, Mass., May 1, 1912.

THE J. B. MOREY NURSERIES, Dansville, N. Y.

Gentlemen: We received the box of trees. Trees were all right, just as we ordered.

Yours respectfully,

E. W. Coombs & Son.
